

## Biomedical Engineer Opportunity

### Sponsor

Canadian Space Agency (CSA)

### For More Information

For more information and how to apply see the [website](#). [1]

### Description

The Canadian Space Agency is looking for a biomedical engineer to explore new horizons in remote healthcare and lead collaborative R&D projects that will enable future human deep space missions to the Moon and Mars, while potentially benefiting remote, medically isolated communities here on Earth. This biomedical engineer position will be filled through an open competitive process for the creation of a pool of applicants in various disciplines of engineering, including those with a biomedical engineering background.

**Closing date: April 1, 2021 - 23:59, Pacific Time**

### Special Notes

Please note that research activities carried out in the context of COVID-19 need to adhere to the University of Guelph COVID-19 research principles, policies, guidelines and processes as they may be updated from time to time and communicated on the [Office of Research web-page](#) [2].
