
Driven crazy by Research Alerts? How to control them

You can customize your Research Alerts settings to ensure that the alerts you receive are relevant to you. If you don't wish to receive all alerts, specify the discipline relevant to your research program. You can also adjust the frequency with which you receive alerts (i.e., receive a daily digest of all alerts publish each day), and whether or not you receive calendar notifications.

Just sign into [Research Alerts](#) with your central login information, select "My Settings" from the black menu bar, and chose the options that suit you best.

Alert ClassificationsCategory:

Research Management and Support

Disciplines:

Health and Life Sciences

Humanities

Information and Communications Technology

Physical Sciences and Engineering

Social Sciences
