How high should you aim when submitting your paper for publication? What should your cover letter say? How long should you wait before contacting the editor to enquire about your submission? What should you do when the referee's report completely misses the point of your paper? Is writing a book chapter a good use of your time? What are my options for meeting the Tri-Agency requirements to make my journal article available open access?

The session is hosted by the Office of Research, CSAHS and OAC.
