### **Description**

The New Scientific Collaboration Support Program aims to accomplish the following objectives:

- Support developing new expert partnerships between France and Canada,
- Promote the advancement of research and innovation,
- Prepare and structure scientific cooperation between the two countries,
- Promote researcher mobility, particularly for young researchers, and
- Provide research training for young researchers.

This program provides financing for new scientific projects jointly developed by French and Canadian teams **that have never worked together before**. Submitted proposals must be joint projects between a French institution (all universities, Grandes Écoles, and research organizations are eligible) and one of the 20 FCRF's Canadian member universities.

Requests to renew previously awarded FCRF financing will not be accepted.

## Eligibility

Criteria of eligibility:

- The research projects of the selected applicant must be part of the Franco-Canadian research project preselected by the FCRF's Canadian member universities.
- The selected applicant must hold Canadian citizenship.
- The applicant's research projects must make positive contributions to the vitality of scientific cooperation between France and Canada.

Only projects involving **collaboration between researchers who have never worked together** will be taken into consideration.

## Maximum Project Value

\$8,000 to \$15,000, according to the needs expressed by the principal investigators.

## Project Duration

Two years
