### **Description**

Innovative Solutions Canada Program–Testing Stream (ISC TS) is an R&D program aimed at procuring, testing and evaluating R&D, pre-commercialized goods and services in the late stage development (Testing Readiness Level (TRL) 7 to 9). Public Works and Government Services Canada (PWGSC) is issuing a Call for Proposals (CFP) on behalf of Innovation, Science and Economic Development Canada (ISED) and participating departments, seeking Innovations to address a variety of Problem Statements and Topics which reflect the departmental requirements of participating federal departments and agencies. More specifically ISED is seeking solutions to the Testing Stream Problem Statements and Topics outlined on the [ISC website Open Funding Opportunities page](#) [2]. The purpose of this CFP is to create a pool of conditionally qualified suppliers that Canada may select from to address Government of Canada organizations' requirements. Prequalification into a pool does not guarantee that a contract will be awarded.
