New CanCOVID community platform coming soon

Earlier this fall, CanCOVID announced federal funding and new partnerships with the [Rapid Evidence Access Link \(REAL\)](#) and [COVID19Resources](#) platform.

In a few weeks, CanCOVID will be launching their new website, which will feature new digital collaborative publishing tools, personalized notifications when the government has a query relevant to a researcher's research areas, and a dynamic library of knowledge products.

CanCOVID will connect people to each other and compelling projects in COVID-19 response.

Who can join the CanCOVID platform?

The CanCOVID platform is by invitation, and is restricted to verified members of the COVID-19 expert research and response community. For an inclusive list of research fields with recognized expertise, please visit [CanCOVID](#).

How to apply

If you would like to participate in this collaboration opportunity, please notify your College-level Associate Dean Research (ADR) for awareness.

Researcher's are encouraged to share their research interests via the new CanCOVID [registration form](#).

Special Notes

Please refer to the [Office of Research COVID 19 web-page](#) for directives related to research activities at the University of Guelph.
