Description

The Discovery Grants program supports ongoing programs of research with long-term goals rather than a single short-term project or collection of projects. These grants recognize the creativity and innovation that are at the heart of all research advances. Discovery Grants are considered “grants in aid” of research, as they provide long-term operating funds and can facilitate access to funding from other programs but are not meant to support the full costs of a research program.

Recipients of Discovery Grants are not restricted to the specific activities described in their applications and may pursue new research interests, provided they are within NSERC's mandate and adhere to the principles and directives governing the appropriate use of funds as outlined in the [Tri-agency Guide on Financial Administration](#) [11]. This provides researchers with the flexibility to pursue promising research avenues as they emerge and the opportunity to

address higher risk (higher reward) topics. Researchers can use their grants to participate in collaborative efforts.

Applicants are expected to increase the inclusion and advancement of under-represented and disadvantaged groups in the natural sciences and engineering, as one means to enhance excellence in research and training. Applicants should refer to the Discovery Grants application instructions and the [Guide for applicants: Considering equity, diversity and inclusion in your application](#) [12].

The Discovery Grants Program assists in:

- promoting and maintaining a diversified base of high-quality research capability in the natural sciences and engineering in Canadian universities;
- fostering research excellence; and
- providing a stimulating environment for research training.

For full details on the program, please visit the [NSERC Discovery Grants program web-page](#) [13].

Eligibility

Applicant eligibility

- Eligibility for applying for/holding an NSERC grant:
 - Hold (or have a firm offer) for an academic appointment at an eligible Canadian university at the time of application. This can be a tenured, tenure-track or lifetime professor emeritus position; or a paid or unpaid term or contract position of no less than three years. The position must be finalized no later than six (6) weeks following the competition deadline of November 1, 2021.
 - The position must require the individual to engage in research that is not under the direction of another individual; and
 - The position must authorize the individual to supervise or co-supervise the research of students registered in an undergraduate or graduate degree program, or postdoctoral fellows (e.g. thesis supervision and not supervision of regular course or laboratory assignments).
- While there are no specific sections dedicated to naming or describing specific collaborations, it is at the applicant's discretion if they would like to disclose such information.
- Applicants are categorized as either Early Career Researchers or Established Researchers. Refer to the [Discovery Grants - Applicant Categories](#) [10] for more information.
- Researchers can apply for and hold only one Discovery Grant at a time. Researchers who hold a Discovery Grant cannot reapply for another Discovery Grant until the last year of their current award. If you currently hold a team grant and wish to apply individually, consult NSERC.

Subject matter eligibility and funding from other sources

Applicants to the Discovery Grants program must present a program of research that is eligible under NSERC's mandate, which is to promote and assist research in the natural sciences and engineering, other than health. The objectives of the research program must be to advance knowledge in the natural sciences or in engineering. The application will be rejected if NSERC determines, at any time during the review cycle, that the subject matter is outside of its mandate. Refer to [Selecting the appropriate federal granting agency](#) [14], the [Addendum to the guidelines for the eligibility of applications related to health](#) [15], the [Peer review manual](#) [16], and [NSERC Discovery Grants process for decisions on mandate eligibility](#) [17] for further information on the eligibility of subject matter.

Applicants to the Discovery Grants program must present a program of research that is conceptually distinct from research supported by the Canadian Institutes of Health Research (CIHR) or the Social Sciences and Humanities Research Council (SSHRC).

NSERC encourages researchers to obtain funds from other sources to support the full costs of the research program presented in their Discovery Grant application, as long as the funding source is not CIHR or SSHRC and the funds cover different expenses from the ones proposed in the Discovery Grant application.

Indirect Costs

0%.

Project Duration

Grants are normally awarded for five years. Although a shorter duration can be requested, NSERC may award a grant for the normal duration.

Researchers can apply for and hold only one Discovery Grant at a time. Researchers who hold a Discovery Grant cannot re-apply for another Discovery Grant until the last year of their current award.

Special Notes

NSERC live webinars and pre-recorded videos

Due to COVID-19, NSERC is replacing live webinars with pre-recorded videos followed by live Q&A sessions. This series is meant to assist the research community on how to complete an application using the [Research Portal](#) [18] and the NSERC [Canadian Common CV](#) [19] (CCV). Pre-registration is not required to attend the live Q&A sessions. Please note, NSERC staff may not have time to respond to all individual questions during the session. Any additional questions should be directed to their support team at [NSERC Discovery](mailto:resgrant@nserc-crsng.gc.ca) [20] at resgrant@nserc-crsng.gc.ca [20].

[Link for live Q&A for August 24, 2021](#) [21]

[Link for live Q&A for September 23, 2021](#) [22]

[Link to pre-recorded videos](#) [23]

COVID-19

Please note that research activities carried out in the context of COVID-19 need to adhere to the University of Guelph COVID-19 research principles, policies, guidelines and processes as they may be updated from time to time and communicated on the [Office of Research web-page](#) [24].

Update to NSERC Discovery Accelerator Supplements

As of the competition year 2022, NSERC's [Discovery Accelerator Supplements \(DAS\) program](#) [1] is suspended until further notice

Deadlines

If College-level review is required, your College will communicate its earlier internal deadlines.

Type	Date	Notes
Internal Deadline	Monday, October 25, 2021 - 4:30pm	Applicant submits a signed OR-5 to: research.services@uoguelph.ca [25]. Applicant also clicks "submit" in the Research Portal so the final, 'Full Application' appears on the Office of Research server. Please consult with your College Research Manager and/or Associate Dean of Research regarding any College-specific internal deadlines.
External Deadline	Monday, November 1, 2021 - 8:00pm	Final application will be submitted to NSERC online by the Office of Research Services.

How to Apply

NSERC Discovery Grants - 2022 Competition (Full Application)

Published on Research Alerts (<https://www-research.uoguelph.ca/research/alerts>)

Applicants must have successfully submitted a Notice of Intent (NOI) by August 3, 2021 in order to be eligible to submit a Full Application. This is a mandatory step in the application process.

Complete Application including List of References, Budget Justification and Samples of Research Contributions (maximum of 4 reprints or preprints and/or manuscripts, excerpts from your thesis, technical reports, etc.) along with a Canadian Common CV, are to be submitted electronically to Office of Research Services via the NSERC [Research Portal](#) [27]. Upon approval, Office of Research Services submits the final version on behalf of the University using the [Research Portal](#) [27].

For Questions, please contact

Discovery Grants (DG) General Inquiries: resgrant@nserc-crsng.gc.ca [20].

Technical Support: If you require technical assistance for the Research Portal, contact NSERC technical support by email at webapp@nserc-crsng.gc.ca [28].
