Description

Academic Industry Meeting day, or AIMday™, is an internationally recognized opportunity to tackle questions around a central theme. This highly effective program enables university-based researchers and organizations to connect and bring world-class research to life. By matching an organization's need for new knowledge with academic expertise, AIMday brings understanding and new perspectives to real-world problems!

Hosted by [Toronto Metropolitan University](#) and the [Urban Water Research Centre](#) in collaboration with the [Ontario Water Consortium](#) and [Queen's University](#), AIMday™ Water aims to address current challenges that affect water – including urban sprawl and land intensification, increasing consumption and climate change – which have impacted local ecosystems and water infrastructure. It is a unique opportunity where academic experts respond to a question or challenge from organizations. This event, taking place virtually on **November 24, 2022**, will offer organizations an unprecedented opportunity to chart new paths and reimagine how to address ongoing water concerns.

AIMday Water 2022 Registration

- **Free** for all participants
