Polar Knowledge Canada (POLAR)

Program

A new competitive funding process for the period of April 1, 2017 to March 31, 2019.

For More Information

[For more information on the process and eligibility](#) [2]

Description

POLAR, Canada's lead federal agency to advance knowledge of the Arctic and strengthen Canadian leadership in polar science and technology, has an integrated suite of grants and contributions that supports the Northern Science & Technology and Polar Knowledge Application (PKA) programs. POLAR is inviting eligible applicants to submit a letter of intent (LOI) for projects related to science and technology as well as knowledge mobilization and engagement. These projects will seek to develop and leverage knowledge and capacity to help support responsible and informed development in a rapidly changing North.

Eligibility

The following Canadian organizations are eligible to submit an LOI:

- Educational and academic institutions;
- Provincial, territorial, and municipal governments;
- Indigenous organizations;
- Northern communities;
- For-profit organizations; and

Published on Research Alerts (<https://www-research.uoguelph.ca/research/alerts>)

- Not-for-profit and non-governmental organizations.

Note that federal government departments/agencies and international organizations are not eligible for funding but may participate in the project as a partner.

Funding Availability

Given POLAR's pan-northern mandate, the agency will ensure an appropriate distribution of funding across the Canadian Arctic to support projects focused on knowledge mobilization and engagement, as well as science and technology.

Maximum Project Value

Projects must be supported by other sources of funding that contribute to the direct costs of the project. This support can be in the form of financial or in-kind contribution and can come from either a partner involved in the project or from the organization applying for funding. At a minimum, an in-kind contribution from the organization applying for funding is required, as it reflects its active involvement in the project.

For projects submitted to the Northern Science and Technology Program, these contributions must represent **at least half** the amount requested from POLAR. For projects applying to the Polar Knowledge Application Program, contributions from partners in the form of financial and/or in-kind are required, however, no minimum has been set.

Project Duration

POLAR will support projects for the period from April 1, 2017 to March 31, 2019.

Special Notes

Projects that are funded through the Marine Environmental Observation Prediction and Response (MEOPAR) Network-POLAR joint Call for Proposals to support the Year of Polar Prediction will not be considered in this call. Please visit the [MEOPAR website](#) [3] for more information.

Deadlines

If College-level review is required, your College will communicate its earlier internal deadlines.

Type	Date	Notes
Internal Deadline	Thursday, January 19, 2017 - 4:00pm	LOIs and signed OR-5 form must be sent to resserv@uoguelph.ca [1] to

Type	Date	Notes
		obtain institutional signature on the cover page.
External Deadline	Monday, January 23, 2017 - 4:30pm	Please submit the complete LOI package to grants-contributions@polar.gc.ca [4].
Internal Deadline	Friday, February 17, 2017 - 4:30pm	Successful applicants will be contacted and complete application details will be available on February 6, 2017 . Please submit the complete full application according to the upcoming instructions along with a signed OR-5 form to research.services@uoguelph.ca [5].
External Deadline	Friday, February 24, 2017 - 4:30pm	Application to sponsor due. Full application details will be available on February 6, 2017.

How to Apply

Applying to POLAR's Grants and Contributions Programs is a two-step process.

The first step in this process is the submission of Letters of Intent (LOI) by **January 23, 2017** for projects related to the following grant and contribution programs:

1. Northern Science & Technology Program

Includes projects related to the four strategic priorities:

- Baseline information to prepare for northern sustainability;
- Predicting the impacts of changing ice, permafrost, and snow on shipping, infrastructure, and communities;
- Alternative and renewable energy for the North; and

Polar Knowledge Canada: Call for letters of intent (LOI)

Published on Research Alerts (<https://www-research.uoguelph.ca/research/alerts>)

- Catalysing improved design, construction and maintenance of northern built infrastructure.

2. <>Polar Knowledge Application Program

Aims to promote and further strengthen polar science and technology nationally and internationally and build science capacity through training, outreach, increased knowledge sharing and learning opportunities. Includes projects that mobilize new or existing knowledge of the Canadian North to improve economic opportunities, environmental stewardship, and the quality of life of Northerners and all Canadians.

The LOI submission consists of a cover letter (Part A; maximum 2 pages) and an application form (Part B; maximum 5 pages).

Applicants who are successful in this process will be invited to submit a full application.
