- Evaluation criteria

To get a better understanding of SFARI's various funding initiatives in 2023 and whether the Pilot Award may be the best mechanism to support your project, please read our blog post, "[Updates to SFARI's 2023 requests for grant applications](#) [2]."

Description

The mission of the Simons Foundation Autism Research Initiative (SFARI) is to improve the understanding, diagnosis and treatment of autism spectrum disorders (ASD) by funding innovative research of the highest quality and relevance.

The goal of the Pilot Award is to provide early support for exploratory ideas, particularly those with novel hypotheses. Appropriate projects for this mechanism include those considered higher risk but with the potential for transformative results. Projects that represent continuations of ongoing work (whether funded by SFARI or other funders) are not appropriate for this mechanism.

This funding mechanism is particularly suitable for investigators who are new to the autism field, though we encourage those new to the field to consult with experts in autism research to ensure their projects are relevant to the human condition.

Eligibility

All applicants and key collaborators must hold a Ph.D., M.D. or equivalent degree and have a faculty position or the equivalent at a college, university, medical school or other research

facility.

Applications may be submitted by domestic and foreign nonprofit organizations; public and private institutions, such as colleges, universities, hospitals, laboratories, and units of state and local government; and eligible agencies of the federal government. There are no citizenship or country requirements.

Maximum Project Value

\$300,000 total per project

Indirect Costs

20%

Project Duration

Up to 2 years

Deadlines

If College-level review is required, your College will communicate its earlier internal deadlines.
