

Webinar series: Artificial Intelligence Innovations in Future Farming and Food

Description

Join this series of webinars where experts from the **University of Guelph** and **Wageningen University and Research**, in the Netherlands, explore the latest advancements in AI technology in the agriculture and food industry. Gain insights from experts on the challenges associated with AI technology development and adoption as well as the necessity for new policies and strategies concerning data exchange and valuation.

The webinar series consists of four panel sessions that focus on various aspects of integrating artificial intelligence and data-driven solutions in the agriculture and food sectors. Topics include technology integration and adoption strategies, ethical and social issues, and data exchange and valuation throughout the supply chain. The webinars will take place on Tuesdays throughout June, from 11 AM to 12 PM EST.

You can register for the webinars/panels through Eventbrite links listed below.

- **June 11 - Webinar 2:** [Social, Ethical, and Legal Issues of Integrating AI in Agri-Food](#)
- **June 18 - Webinar 3:** [Enhancing Adoption of AI in Agri-food: a Path Forward](#)
- **June 25 - Webinar 4:** [Building the Agri-Food Data Economy: Valuation and Exchange Realities](#)

Note: **Webinar 1**, on Data-driven and Artificial Intelligence Solutions in the Agri-Food Sector, took place on June 4.
