

Webinar - CIHR - Population Health Intervention Research

Date

Monday July 27, 2015 1:00pm to 2:00pm

Description

Featuring: [Dr. Malcolm King](#) [1] *Scientific Director for the [CIHR-Institute of Aboriginal Peoples' Health](#)* [2] and [Dr. Nancy Edwards](#) [3], *Scientific Director for the [CIHR-Institute of Population and Public Health](#)* [4]

[Population Health Intervention Research](#) [5] supports research on program and policy interventions within and outside the health sector (such as education, transportation, social services, housing and the arts) planned and funded by community, not-for-profit, private, and/or public organizations that have an impact on health and health equity. These interventions, which often lack mechanisms for assessing what works, why and how to apply this knowledge to new programs or policy decisions, can benefit from researcher expertise and scientific study.

In particular, the [CIHR Roadmap Signature Initiative on Pathways to Health Equity for Aboriginal Peoples](#) [6] is interested in funding population health intervention research projects as a means to support Aboriginal health research in Canada.

To be considered under the Pathways Initiative, applicants must focus on a policy or program intervention relevant to Aboriginal Peoples' health at a national, provincial/territorial and/or regional level and be related to Pathways exemplars (Suicide prevention, Obesity/Diabetes, Tuberculosis and Oral Health). Examples of potential relevant interventions to be studied include, but are not limited to:

- Housing policies and the impact on tuberculosis prevention and control;
- Provincial funding/payment models for dentists and dental therapists to deliver preventive oral health interventions;
- Community-driven programs to improve health and health equity through diabetes prevention;
- Research on social enterprises as interventions.

The Public Health Agency of Canada encourages research on Aboriginal Head Start in urban and northern communities and the Community Action Program for Children (CAPC).

To receive registration details for the webinar, email ipph@uottawa.ca [7]
