Description

The successful Dream Team will develop a translational cancer research project that addresses critical problems in breast cancer patient care. The project must include new anti-cancer therapeutic interventions for breast cancer that would be expected to improve progression free and/or overall survival, and deliver near-term patient benefit through investigation by a multidisciplinary, multi-institutional, synergistic Dream Team of expert investigators (therapeutics might include pharmaceuticals, biologics, vaccines, surgical interventions, and medical devices). The Dream Team leadership (Leaders and Principals) involve institutions from a minimum of 3 different Provinces.
