

Animal Care Committee Guideline

Number: 8

Effective date: May 2000

Date Revised: March 2009

Interference with or Removal of Animals used in Teaching, Research and Display from University Animal Facilities

Guideline

The Animal Care Committee of the University of Guelph is concerned that interference with, or unauthorized (as per AUP approval) removal of animals to other locations, can threaten the well-being of animals at our institution and may result in an increased number of animals being utilized and/or euthanized due to injury. Activities of this nature detract from the University community's ongoing efforts to provide appropriate animal care and management.

All such incidents coming to the attention of the Animal Care Committee will be referred to the appropriate disciplinary authority.

Guideline approved by the University of Guelph Animal Care Committee on: March 2009
