DMP Assistant is a bilingual tool for preparing data management plans (DMPs). The tool follows best practices in data stewardship and walks researchers step-by-step through key questions about data management.

Step 1

Sign up with DMP Assistant

Step 2

Sign in and select a template under Organizations. The Portage template is the default.

Step 3

Answer the questions that are relevant to your work. Guidance and examples are provided.

Step 4

Revisit the tool throughout your research to review or revise your answers.

Sign in

If you have an existing account with DMP Assistant or previous version of DMP Builder.

Sign up

New to DMP Assistant? Sign up today.

Please note that we are currently working on single sign-in authentication. For now, please create a new DMP Assistant account. You will have the option to link your DMP Assistant account to your campus ID when that feature becomes available.

LOCAL SUPPORT

Research Data Services – lib.research@uoguelph.ca

- Data Management Plan (DMP) support
- Research Data Management support
- Data repository services – mediated deposit
 - <https://dataverse.scholarsportal.info/dataverse/guelph>

LOCAL SUPPORT

- One-on-one consultations
- Workshops – general and bespoke
 - Intro to Research Data Management
 - Creating Data Management Plans
 - Preparing data for deposit
- Online support materials

Sharing & Reusing Your Data

Plans for sharing and reusing data are an integral part of the Research Data Management Planning process.

Many funders as well as journal publishers have [policies](#) which encourage, expect, or require researchers to prepare and provide their data for sharing. This is particularly true of data produced through public funding.

The OECD declaration on access to research results, to which Canada is a signatory, sets out reasons for sharing research.

- [OECD Declaration on Access to Research Data from Public Funding](#)

Rationale for sharing data:

- Encourages scientific enquiry
- Promotes innovation
- Reduces duplication of research projects
- Leads to new collaborations
- Increases impact of research results
- Reduces costs of research in developing nations
- Encourages scrutiny, transparency and accountability
- Can be used in teaching

We are always happy to answer your questions and assist you further. [Contact us.](#)

Preparing data for sharing

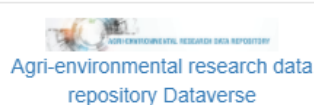

Preparation of data for sharing begins with the creation of a data management plan during the initial stages of the research project. Researchers should familiarize themselves with the policies of their funders as part of the planning process.

Factors to consider include:

- Legal and ethical implications
 - Will confidentiality of participants be compromised?
 - Will sensitive information be compromised?
 - Will it violate contractual agreements?
 - Will it violate licencing agreements?
 - Was sharing included in the informed consent agreement?
 - Will the data need to be anonymised prior to release?
 - Do you have consent from project partners?
 - Do you have the right to share secondary data?
- Intellectual property rights
 - Will you be commercializing or seeking patents?

Instructions and guidance materials on how to prepare your research data for sharing and preservation and how to deposit your research data in the Agri-environmental Research Data Repository or the University of Guelph Research Data Repository. If you have any questions or require...

Can application of enhanced efficiency fertilizers at planting reduce N losses from grain corn production in Ontario?

Oct 2, 2020 - Project 3

Claudia Wagner-Riddle Lab, 2019, "Can application of enhanced efficiency fertilizers at planting reduce N losses from grain corn production in Ontario?", <https://doi.org/10.5683/SP2/UOCUZE>, Scholars Portal Dataverse, V3

This project evaluated a combination of Right Time and Right Product practices aimed at reducing these environmental nitrogen losses from corn. We addressed the following questions: 1) Can application of the Right Product at planting reduce environmental losses compared to the re...
